

Case Study

DANCE.LAB

Vienna

Overview

Four young and ambitious dance teachers founded DANCE.LAB in the Austrian capital with the aim to give access to performing arts training to anyone who is interested, no matter their age.

This is why everyone is welcome at DANCE.LAB and the course programme is just as varied as the students: Aside from dance classes, members can also take singing and acting lessons.

“ Our Harlequin floor is perfect for our students and allows them to find their style. ”
Petra Böhm
Studio director

Case Study

DANCE.LAB

Vienna

Requirements

A number of different dance types are taught at the studio and the rooms are also used for fitness workshops, seminars, photo shoots and events, therefore the dance floor needed to be multi-functional and resilient.

Installation

Ballet, hip hop, tap, lyrical, jazz, acrobatics and modern dance classes are just a few examples of the varied DANCE.LAB curriculum. In order to provide the best injury protection for students and teachers across all the different dance styles, a sprung floor was installed in the studio.

Sprung floors reduce the risk of an injury through impact or from longer-term stress on muscles and joints by gently softening landings and returning energy to the body in a controlled manner. For DANCE.LAB, the Harlequin Flexity panel system was chosen due to its flexibility of use and uncomplicated installation.

The durable Harlequin Reversible Pro performance vinyl was installed on the surface to finish the studio with a smooth dance surface which provides a good level of grip. It is equally suitable for dancers who wear trainers, ballet slippers or who dance with bare feet.
