

USAGE INSTRUCTIONS FOR HARLEQUIN VINYL FLOOR CLEANING PRODUCTS

Harlequin Vinyl Daily Cleaner

This is a general-purpose non-perfumed vinyl floor cleaner with both antistatic and antibacterial properties. Effective at removing residual marks or film present after the manufacturing or installation process. This should be used as the routine cleaner, frequency of use will depend on the level of soiling. **A 1 litre bottle should provide coverage for approximately 100m².**

- Prior to cleaning, sweep or vacuum the vinyl to remove any loose dirt and dust.
- For general use, dilute the Harlequin Vinyl Daily Cleaner in the ratio of 1:50; 100ml in 5 litres of warm water.
- The diluted solution can be mopped on.
- Rinse with clean water and allow to dry thoroughly.

Harlequin Vinyl Heavy Duty Cleaner

This is a concentrated, heavy-duty deep cleaner designed to cut through a build-up of residue and emulsion. We recommend that a deep clean is carried out on your Harlequin vinyl performance floor once or twice a year. This will also remove a build-up of vinyl dressing and maintainer (if you have used these on your floor). **A 1 litre bottle should provide coverage for approximately 20m² to 30m².**

- Prior to cleaning, sweep or vacuum the vinyl to remove any loose dirt and dust.
- Dilute the Harlequin Heavy Duty Cleaner in the ratio of 1:25; 200ml in 5 litres of hot water.
- The diluted solution can be mopped on. Leave for 2-5 minutes. The solution will turn white when it is working.
- Rinse with clean water and allow to dry thoroughly.

Removing stubborn marks

Common marks which are difficult to remove are shoe scuffs and heel marks. If the Harlequin Vinyl Daily Cleaner is not effective on individual stubborn marks we would recommend mixing the solution in a ratio of 1:25 (10ml in 250ml of warm water) and using a spray bottle to spray the solution directly onto the mark. Wipe off with a damp microfibre cloth or mop. If the mark persists, use a magic sponge.

***As with all cleaning products, please make sure you read the health and safety instructions for each product on the reverse side of the bottle.**
