

Leeds City College Quarry Hill Campus

Case Study

Leeds City College

Overview

Leeds City College, part of the Luminare Education Group, opened the Quarry Hill Campus in the city's Cultural Quarter in 2019. The nine-story complex accommodates 3,000 students in the state-of-the-art facility and is home to the college's School of Creative Arts.

Vocational training facilities in the new development include professional dance and performance studios, TV and media suites, workshops and a 200-seat theatre.

“Having worked with Harlequin Floors in many previous projects I was delighted that they provided the flooring solution for all five of our new dance studios here on the Quarry Hill campus. We need floors that are resilient and easy to maintain to give the best experience to our students and industry partners. Harlequin floors continue to give us that reliability and quality.”

Richard Lee
Head of Department Media, Music

Project highlights

- Name:** Leeds City College

- Location:** Quarry Hill Campus

- Project Type:** Dance studios - supply and installation

- Product type:** Harlequin Activity, Harlequin Standfast, Harlequin Cascade and Harlequin Freestyle

- Contractor:** Wates Construcion

- Architect:** Ellis Williams Architects

Case Study

Leeds City College

The requirement:

Supply and installation of 11 purpose-built dance and rehearsal studios, TV and Drama Studios.

The solution:

Harlequin's expert technical team installed a fully-floating Harlequin Activity sprung floor system in all of the professional-standard studio performance spaces, topped with Harlequin Standfast, Harlequin Cascade and Harlequin Freestyle vinyl surfaces.

Harlequin Mirrors and Harlequin Ballet Barres completed the installation. All floors were completed with fully welded seams and composite edge trims.

About Harlequin Activity

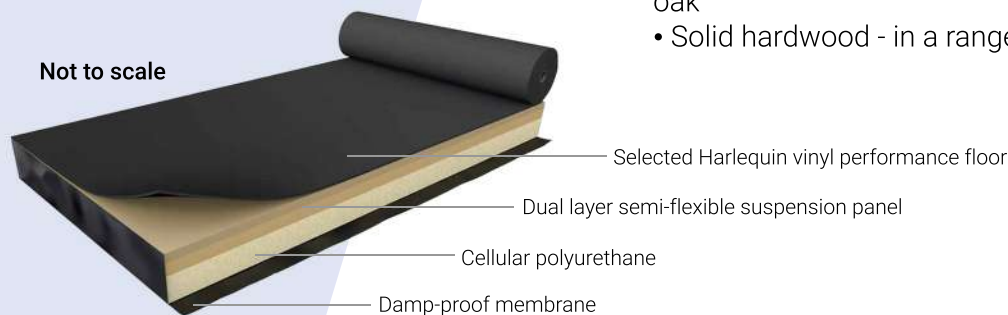

Harlequin Activity is a permanently installed sprung floor system, based on the well-established 'triple sandwich' construction originated by Harlequin over 30 years ago. It is a fully-floating system with no fixings to the sub-floor and can be laid on any reasonably smooth and flat surface without prior preparation.

Harlequin Activity is shock-damped to avoid a 'trampoline' effect and to offer identical characteristics across the whole floor. It is an 'industry standard' choice with many hundreds of installations worldwide, effectively reducing injuries to both teacher and performers.

Harlequin Activity is installed by our own highly-skilled technical team and all work is fully guaranteed.

Different surface options include:

- A Harlequin vinyl performance floor, selected from our range
- Engineered board with a hardwood wear layer in beech or oak
- Solid hardwood - in a range of options
